Description			
<p>I'm not sure how this happened, but many of the cards in the deck Martian Gunslinging do not have backgrounds. I have verified that this is not a case of "the system isn't showing the backgrounds" but rather the data does not describe any background. Perhaps it got dropped on the floor by an earlier version of the software (I remember backgrounds!).</p> <p>Add backgrounds, and have them exported. Frank or Jay can check it in for you.</p>
