

Secrets of Toanium - Bug #429

Server crashes when trying to delete a primary image of an Item

05/12/2026 05:33 PM - Administrator Administrator

Status:	Closed	Start date:	05/12/2026
Priority:	Normal	Due date:	
Assignee:	Jay Gischer	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Description			
Here is the stack trace:			
<pre>Exception while invoking method 'item.update2' TypeError: Cannot read property 'modifiers' of undefined at MethodInvocation.item.update2 (imports/api/items.js:83:66) at maybeAuditArgumentChecks (packages/ddp-server/livedata_server.js:1803:12) at packages/ddp-server/livedata_server.js:727:19 at Meteor.EnvironmentVariable.EVp.withValue (packages/meteor.js:1234:12) at packages/ddp-server/livedata_server.js:725:46 at Meteor.EnvironmentVariable.EVp.withValue (packages/meteor.js:1234:12) at packages/ddp-server/livedata_server.js:723:46 at new Promise (<anonymous>) at Session.method (packages/ddp-server/livedata_server.js:697:23) at packages/ddp-server/livedata_server.js:561:43</pre>			
This happened when I clicked the red X to delete a primary image. I have not checked deleting a background image. The image was a locally stored image. I am not sure if that matters.			

History

#1 - 05/19/2026 10:43 PM - Frank Fernandez

- Status changed from New to Resolved

- Assignee changed from Frank Fernandez to Jay Gischer

The result of one of the fixes not being pushed before. Should be good to go now, please let me know if it happens again.

#2 - 05/20/2026 09:00 PM - Administrator Administrator

- Status changed from Resolved to Closed

Pushed with 0.32.3
